

URBAN CLIMB MILTON

Urban Climb is an indoor rock climbing centre with fitness suites. Its Milton facility went into an empty warehouse with works including all new showers, toilets, changing rooms, gymnasium and indoor rock climbing wall.

The client wanted the new climbing gym to offer 'chill out areas' and collaborative workspaces for entrepreneurs and professionals - functional yet retro styling with an eclectic mix of furniture and industrial finishes were used to give this warehouse spaces that responded to the social aspect that comes with bouldering.

The success of this fitout meant that Coast2Coast Projects were awarded their second site at Newstead.
